TABLE OF CONTENTS

RELEASE NOTES SUMMARY

These release notes detail the product improvements and new features included in the July 6th release.

Resolved Issues (formerly improvement report)

- The Scholarship Matching tool was occasionally not displaying results.
- The footer text in the Professional Center was not displaying correctly.
- The Student Center account creation confirmation page was displaying text when it should not.

Enhanced & New Features

- The list of AP courses for which students can add their test scores has been updated.
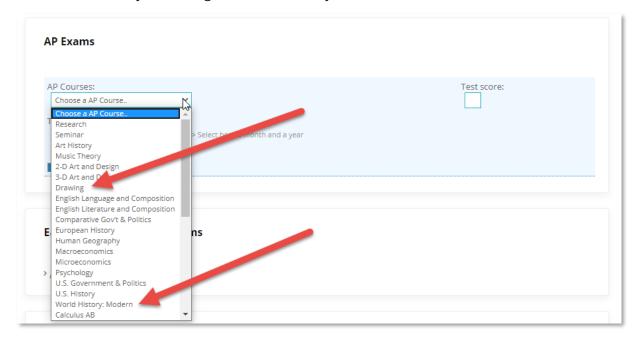

1. RESOLVED ISSUES

This table summarizes the product improvements included in the July 6th release.

	Problem	Improvement
1	**Student Center:** The Scholarship Match tool was occasionally not displaying matching scholarships (despite indicating there were many matching scholarships). (79629)	A data field related to a date field was causing the matching scholarships to not display. The error has been fixed.
2	**Professional Center:** The footer text on some pages in the Professional Center was spilling outside of the display area. (79647)	The formatting has been updated and fixed.
3	**Student Center:** The account creation confirmation page displayed text regarding the account holder's email address when not needed. (79680)	The logic driving the display of the text has been updated so that the email address text displays only when required.

2. AP COURSE LIST HAS BEEN UPDATED

The list of AP courses for which students can record their test scores has been reviewed and updated. The following changes were made:

- Student Art: Drawing was changed to Drawing
- World History was changed to World History: Modern

Updated AP Course List
