3. EFC CALCULATOR UPDATES

The Estimated Family Contribution (EFC) Calculator styles have been updated in both the Financial Planning and the portfolio activity to use improved form and button styling. Additionally, both the Save and Cancel buttons are displayed after the EFC estimates are saved.

Estimated Family Contribution (EFC)

One of the most important numbers in the financial aid process for you and your family is the Expected Family Contribution or EFC. The EFC is the amount your family is expected to contribute towards paying for college. The federal government will determine your EFC when you file the Free Application for Federal Student Aid, or FAFSA.

[Calculate your EFC](#) using the Federal Methodology in College Board's EFC Calculator.

Enter or edit your EFC estimates:

Expected family contribution (EFC) :
\$

Parents' contribution:
\$

My contribution:
\$

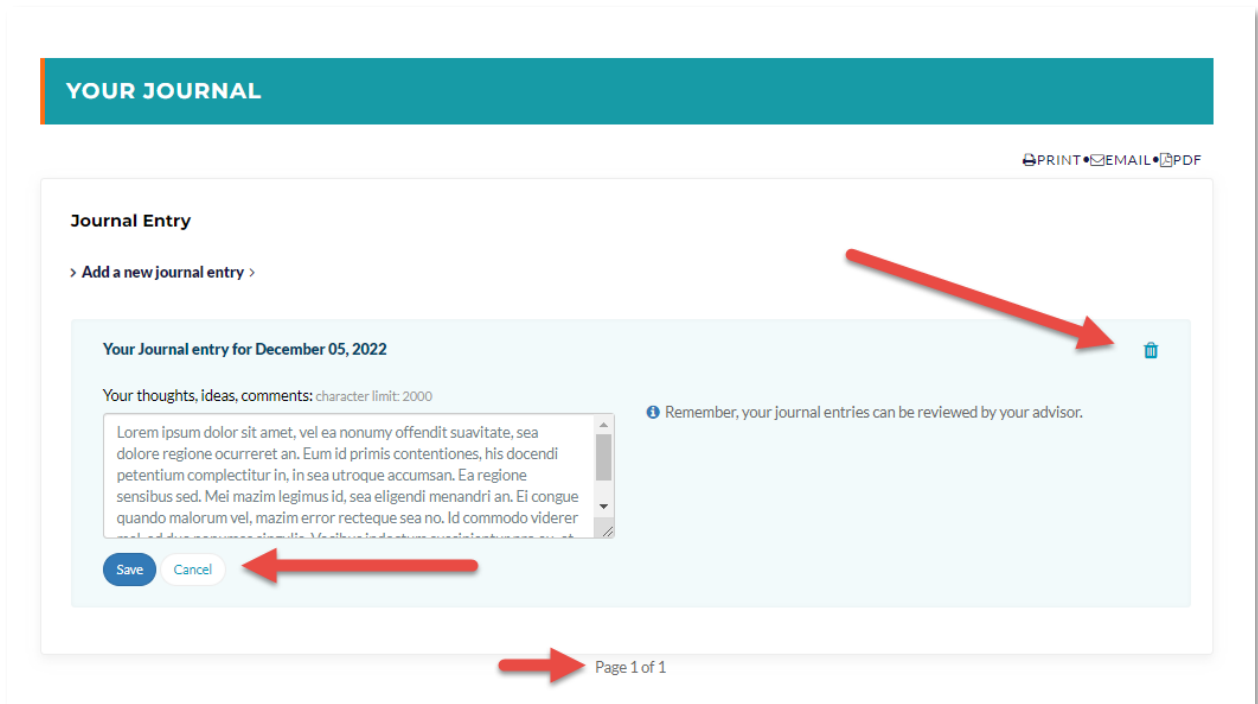

Keep in mind that the estimate of financial need shown can vary significantly among the colleges to which you are applying for aid.

This is because each college sets its own policy about how to determine eligibility for their private funds. Therefore, your final offer of financial aid may be higher or lower than is indicated by this calculator.
