5. ALUMNI OUTCOMES: TOP 25 COLLEGES FIRST ATTENDED

The National Student Clearinghouse (NSC) released a new report that contains data on the top 25 postsecondary institutions that your high school graduates first attended within the two years of exiting high school.

The report is a CSV file that contains at least one row for each student you submit. If the student record matches postsecondary records in the Clearinghouse's database, the record found indicator will equal "Y," and those records will be returned to you in this report. Only postsecondary records on which the student has not placed a FERPA block are included in this report.

All NSC reports are available to schools with add-on licenses for Alumni Outcomes.
