

Key Enhancements

March 6, 2025, Release

1. Optional Phone & Email Fields Added to Work-based Learning Applications

Students are now asked to include a contact phone number and email address on their work-based learning application. This will help both the educator and the employer more easily reach out to arrange interviews or next steps. If an educator forwards a student’s application to a GPS-originated opportunity, the email and/or phone is passed automatically to employer via GPS.

The image shows a form with two input fields. The first field is labeled 'Your Email Address' with a question mark icon and contains the placeholder text 'Your email address'. The second field is labeled 'Confirm Email Address' and is currently empty.

Email request and validation fields on a work-based learning application

2. Improving Verification: Optional Phone Field for Volunteer Activities

Students can now include a contact phone number when logging their volunteer and community service activities, making it easier for educators to verify their experience. This streamlined validation process ensures accuracy while saving time for both students and educators.

3. New CareerViewXR Experiences

Five new CareerViewXR experiences are now available in RUReady.ND.

- Agronomist
- Data Technician
- Pharmaceutical Manufacturer
- Professional Surveyor
- Sunflower Butter Factory

All experiences plus an additional 6th experience – Army National Guard – are available to download for VR headsets.

Bug Fixes & Improvements

- **GED Test Scores** – Resolved inaccurate test score ranges and validations
- **IB Test Scores** – Updated name to International Baccalaureate
- **Scholarships** – Removed expired scholarships
- **Work-based Learning** – Fixed incorrect display of professional’s name on student’s application
- **AchieveWorks Personality** – Fixed incorrect completion status
- **Assignment & Curriculum Builder** – Reinstated edit option on sections for school-level curriculum
