

Key Enhancements

Oct 2, 2025, Release

1. New! Email Notifications for Student Work-Based Learning Applications

Educators can now sign up in the Professional Center to receive automatic email notifications whenever a student submits an application for a Work-Based Learning (WBL) opportunity.

The screenshot shows the 'Account Profile' page for a 'School Account'. The 'My Profile' section on the left identifies the user as Gwen Marsh, a Professional User at North Dakota (CRN Training District). The 'Account' section shows the username 'nd_gmarsh_pro' and role 'Educator/Counselor'. The 'School Or Program' section lists 'North Dakota (CRN Training District)'. The 'My Information' section contains a 'Required Information' form with fields for Title (Ms.), First name (Gwen), Last name (Marsh), Email address (ND_gmail@mailinator.com), Security question (dog's name), and Security answer (Finn). At the bottom of this section, there are two options: 'Students can contact you to reset their passwords:' (selected 'No') and 'Would you like to receive email notification when students submit work-based learning applications?' (selected 'No'). Two red arrows point to the 'No' radio buttons for these two options.

Email notification option in your professional account profile

Why this matters:

- **Stay Informed:** Get real-time updates as students apply without needing to check the system manually.
- **Save Time:** Reduce the need for constant monitoring and focus on supporting students.

- **Support Students Quickly:** Respond faster to application activity—whether following up with feedback, connecting with employers, or tracking progress.

This new feature makes it easier than ever to stay on top of student engagement in WBL opportunities and ensure timely support.

To start receiving notifications, simply opt in from your educator profile settings in the Professional Center.

2. Updated Financial Aid 101

The Financial Aid 101 section has been refreshed with updated content and embedded videos from the Federal Student Aid office. Students will now find clearer explanations, improved organization of topics, and streamlined guidance on the financial aid process.

Benefits for educators and students:

- **Improved Clarity:** Updated content makes financial aid concepts easier for students to understand.
- **Student Confidence:** With more accessible guidance, students can feel better prepared to explore and apply for financial aid.

2. Apply for Financial Aid

How Do I Submit the FAFSA?

When?

You should complete the Free Application for Federal Student Aid (FAFSA) on or after **October 1** of your senior year of high school and each year you're in college.

Step 1: Create Your StudentAid.gov Account

To complete the FAFSA, you will need to create a StudentAid.gov account. This is an account that will enable you to access, complete and electronically sign your FAFSA.

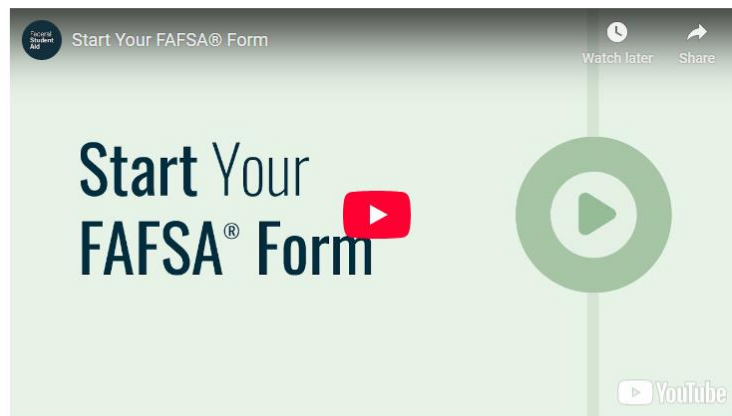

You're welcome to create your StudentAid.gov account at any time -- even long before the FAFSA opens -- but allow up to 3 days for activation. Setting up your account early ensures you're ready to file your FAFSA immediately once it becomes available.

Every contributor who is required to provide information on the FAFSA form (you, your biological or adoptive parent, your parent's spouse, your spouse) needs to create a StudentAid.gov account.

Step 2: Complete the FAFSA Form

StudentAid.gov provides a series of videos to help you and your family complete the FAFSA. Get started with the video below then follow through the playlist for help with each section of the FAFSA.

For additional help in creating a StudentAid.gov account and filling out your FAFSA, check out StudentAid.gov.

The FAFSA is an important first step in applying for financial aid, but some colleges and universities require additional forms before they can send you an award letter. After submitting your FAFSA, check with each school you listed to find out exactly what they need and when it's due -- missing a required form could delay or reduce your financial aid offer.

3. Improved Career Finder Activity

We've refreshed the description of the Career Finder tool to make it clearer and more student friendly. The updated text highlights how students can select characteristics—such as salary, work environment, or career cluster—to instantly see careers that match their choices.

Benefit: This simpler, more engaging description helps students better understand how to use the Career Finder and encourages them to explore career options in a way that feels approachable and relevant.

Updated text on the Career Finder activity

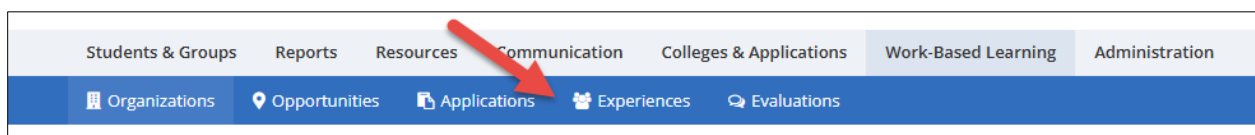

4. Refreshed College Data

The profile information used by students to explore colleges has been updated for more than 6,000 undergraduate schools with the latest information from Petersons. The update includes:

- Revised list of programs for each school.
- Refreshed tuition and admissions information, basic school data such as links to a school's website, contact information, enrollment figures, and more.

5. Work-Based Learning Experiences Tab Added

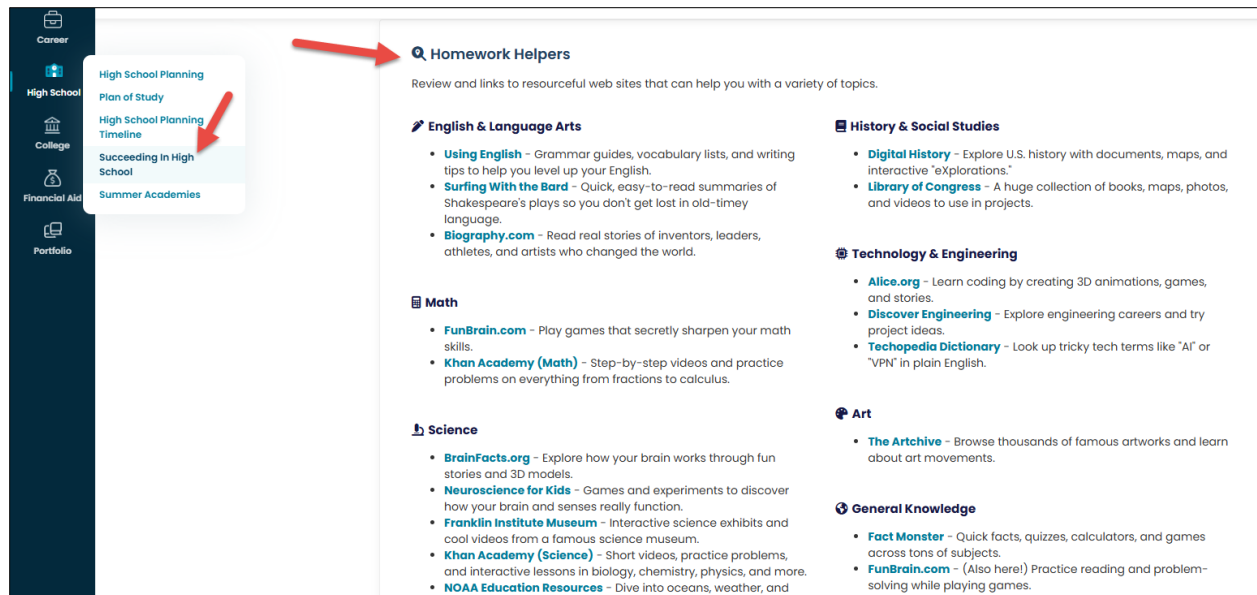

We've added a new Experiences tab to the Work-Based Learning tools in the Professional Center. This feature allows educators to quickly generate reports on students' work-based learning experiences, making it easier to track participation, monitor progress, and support program outcomes.

The new tab gives counselors and administrators a streamlined way to view and report on student engagement in real-world learning opportunities.

6. Updated Homework Helpers

The Homework Helpers links and descriptions in Succeeding in High School have been updated and have a new layout making it easier for students to scan and find the resources they need.
